

# Lords Cricket Ground

## Grandstand Canopy

Not even the greatest, grandest and most iconic sports grounds in the world can afford to rest on its laurels. Quite to the contrary, the Lords Cricket ground has recently undergone a multi-million pound overhaul to ensure that the Ground “remains not only world-famous but truly world-class.” For our role in this master plan, we were briefed to re-design, re-fabricate and reinstall a new roof over the iconic Mound Stand, a task of some magnitude that we delivered on time, below budget and ahead of schedule.

After eighteen years, the acclaimed ‘tented’ roof as it became affectionately known, had reached the end of its lifespan. A younger snappier model was needed to revitalize this world-famous national treasure. The Mound Stand’s new roof shares the same look as its predecessor. Flamboyant multi cone fabric membranes soar skyward, sail like in their splendour, supported by their mast like props from the giant steel super structure below. There is further greatness in the constitution itself, advancements in fabric technology promise that this new roof can revel appreciably longer in all its splendid glory.

**Client**  
Marylebone Cricket Club

**Location**  
St Johns Wood, London

**Date**  
2005

**Material**  
PVC
