

Curriculum Vitae

Kevin Hemmings

Architect at Base Structures

Over 30 years of tensile structure experience specialising in design, development, estimating, marketing, new business opportunities and CPD Presenting.

Qualifications

- BSc Architecture Liverpool University
- B Arch Oxford Brookes University

Employment history

2006 – Present

Architect, Base Structures

As Base Structures resident architect, with over 30 years of tensile expertise, Kevin has been responsible for contracting some of the largest and most exciting tensile projects in the UK and overseas, including installations for BAA, Broadgate Estates, MOD and Railtrack.

Since joining Base Structures Kevin has been actively developing the company's marketing skills, building sales tools and exploring new business opportunities. He is also responsible for interior projects, developing a standard product range of tensile structures and presenting CPDs and webinars to architects and contractors.

Key projects are the refurbishment of St Enoch's Centre in Glasgow, Zaha Hadid's Chamber Music Hall for Manchester International Festival and Zaha Hadid's Mathematics Exhibit in London's Science Museum.

Sept 1996 – Jul 2002

Director / Shareholder, Architen Ltd

Kevin joined Architen shortly before its incorporation in 1986 and was one of three partners who developed the business to achieve international recognition.

From an early hands-on involvement in all areas of the business his core skills included providing an interface with architects and designers to develop sketch schemes. His other major role included marketing and the development of a CPD programme. After the merger with Landrell in 2001 he continued his roles as a Shareholder / Director within the Architen Landrell group.
